ABOUT US

Precision Waste Solutions (PWS) is a nationwide single source waste management company. We provide complete waste and recycling services for all your industrial, commercial, and manufacturing needs. We help small businesses, large corporations, and nationwide chains streamline their waste operations and reduce environmental costs.

Did you know that over 60% of non-residential waste disposal bills have unnecessary fees, overages, surcharges, rate increases, or billing errors? Many of these common “padding” practices are hidden into bundled rates and can be difficult to spot. Most businesses do not have an employee dedicated specifically to reviewing every waste invoice, disputing unwarranted fees, price comparing, scheduling pickups, or monitoring service efficiency. We get it, dealing with waste haulers can be a headache, that’s where we come in. PWS acts as a single point of contact for daily waste management needs which saves time, money, and energy of managing these services internally.

We understand each business has their own unique waste challenges, which is why we offer a no-cost onsite comprehensive waste audit with your management/staff. We’ll evaluate your current services, equipment, schedule, and invoices for inefficiencies and errors. Are you paying to haul off half-empty bins? Are you paying to landfill materials which could be resold as a new revenue stream? Is your current hauler overcharging and/or billing incorrectly? Would the addition of a compactor or other equipment result in reduced costs? Once we fully understand your waste needs and sustainability goals, we create a site-specific program focused on efficient waste removal and cost savings.

Using our industry knowledge and experience, we continuously negotiate the most cost-effective solution with waste haulers, disposal facilities, and vendors for each waste-stream. Our team administers the daily tasks of scheduling, transportation, and disposal of waste and recyclables from start to finish. In addition, regular site visits are made to monitor waste activity and further optimize service and haul efficiency.

One Monthly Invoice- Gone are the days of juggling multiple invoices with different due dates from several vendors. We consolidate all waste related expenses and rebates across all locations into one straight forward invoice. Have specific invoice requirements? PWS can develop a process tailored to your needs.

OUR SERVICES & EQUIPMENT

PWS provides an extensive variety of new and reconditioned trash compactors, balers, containers, and recycling equipment. Installation, training, and preventative maintenance are included with our rentals. Our industry experts are available anytime to discuss all your waste management needs and make recommendations based on your budget.

COMPACTORS

Reduced Waste Volume= Reduced Haul Frequency=
Reduced Costs

- **STATIONARY COMPACTOR**
Ideal for dry waste
- **SELF-CONTAINED COMPACTOR**
Ideal for wet waste
- **VERTICAL COMPACTOR**
Ideal for locations with limited spacing requirements
- **PRE-CRUSHING COMPACTOR**
Maximum compaction, ideal for crushing bulk waste such as drums, wooden pallets, crates, skids, etc.

BALERS

Create bales of recyclable materials and turn trash into revenue

OPEN TOP ROLL-OFF CONTAINER

Ideal for large volumes of waste and special projects. Permanent or temporary. Standard container sizes include 10, 20, 30, & 40 cubic yards

FRONTLOAD DUMPSTERS

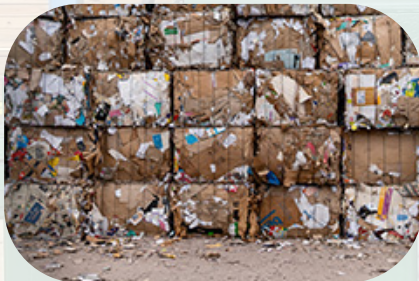

Common for small to medium sized businesses. Available in 2, 4, 6, 8, & 10 cubic yards

SPECIALIZED EQUIPMENT

Tipplers/hoppers, carts, covered roll offs, scrap metal bins, etc.

PORTABLE TOILET RENTAL

Best rates in your area for events, construction projects, industrial job sites, or temporary locations. Clean, well maintained, and serviced regularly.

SUSTAINABLE PROGRAMS FOR EVERY INDUSTRY
